

# Otago South River Care

**Engaging Clutha District communities to improve ecosystem health, freshwater quality and the value of food and fibre products produced in the region.**

## **Supporting farmer led catchment groups:**

- On farm field days
- Encourage good management practices
- Riparian planting
- Trialing stream erosion mitigations
- Installing sediment traps and wetlands
- Providing a voice for South Otago farmers

## **Gauging our water quality and stream health:**

- In stream water monitoring sites
- Macroinvertebrate (MCI) assessments

## **Engaging our tamariki:**

- Local schools adopting a stream
- Urban connection- bringing school classes to our place

## **Encouraging innovation:**

- Exploring new ideas and methods for environmental management in the District

## **Championing community well being and learning:**

- Bringing technical experts to South Otago to learn from
- Community wellbeing evenings

## **Market research:**

- How can we maximise returns on our food and fibre products

## **Keeping you up to date:**

- Updates via Facebook. Check out our page [www.facebook.com/otagosouthernrivercare](https://www.facebook.com/otagosouthernrivercare)
- Advertorials in local papers
- Emails - join the mailing list for updates
- Newsletters and more
